## Investment Process

We identify **INFORMATION GAPS** in Discovery and Rediscovery Phase Companies.

### Discovery Phase:

For companies in the early stages of their investment cycle, we look for superior growth prospects (long-term EPS growth of at least 20%).

### Rediscovery Phase:

Rediscovery companies offer near-term earnings acceleration due to factors such as a change in management, an improved competitive position, a new product cycle or a cyclical upturn. We also look for companies that are takeover candidates. Rediscovery companies are expected to provide a minimum of 40% EPS growth over the next twelve months, or sell at a 40% discount to a company's takeover price.

The composite includes all fully discretionary portfolios invested in Peregrine's Small Cap Growth strategy. Net performance includes the effect of advisory or performance fees, while gross performance does not. Both gross and net performance reflects the reinvestment of dividends and interest, and the deduction of brokerage or other commissions, and any other expenses that a client would have paid or actually paid, other than custodial fees. Performance for the period 1/1/76 through 7/1/84 is for accounts managed by the Small Cap Growth team while they were employed by Peregrine's former parent company and managed the same strategy. Past performance is no guarantee of future results. As with any investment there is always potential for gains as well as the possibility of losses.
