

# SMALL CAP VALUE

*consistently uncovering* VALUE

## Profile

- Disciplined investment process consistently executed since 1996
- Seasoned team of 3 portfolio managers with an average of 26 years of experience
- Limited institutional client base
- Assets under management \$846 million

## Investment Process

Our Small Cap Value team employs a proprietary valuation process to identify the least expensive stocks in each sector which results in a candidate pool of 175 names. To discern true value from the merely cheap, the team conducts extensive fundamental research in search of one of our five Value Buy Criteria:

- Resolvable short-term problem
- Catalyst for change
- Unrecognized assets
- Fundamental undervaluation
- Take-over potential

The presence of our Value Buy Criteria increases the likelihood that an inexpensive stock will return to a state of fair value and outperform its peers.

Portfolios are fully invested in 90 to 110 holdings with no position exceeding 3.5% in weight. The portfolio is always diversified across all sectors.

The composite includes all fully discretionary portfolios invested in Peregrine's Small Cap Value strategy. Net performance includes the effect of advisory or performance fees, while gross performance does not. Both gross and net performance reflects the reinvestment of dividends and interest, and the deduction of brokerage or other commissions, and any other expenses that a client would have paid or actually paid, other than custodial fees. Past performance is no guarantee of future results. As with any investment there is always potential for gains as well as the possibility of losses.
